

Discharge Procedures for WSC Residential Programs

The residential program (intensive residential or halfway house) will:

1. Notify the referring clinician by phone or e-mail about an impending discharge, and a follow-up appointment will be made for the client to re-enter the referring agency for aftercare.
2. E-mail a discharge summary to the referring clinician as soon as possible after discharge.
3. The referring clinician will be e-mailed or called if their client leaves residential care AMA or is discharged early for any reason.
